

Does the Materials sector have similar Total Revenue levels than the Real Estate sector in Year 4?

Here are the histograms for the annual Total Revenue for Materials and Real Estate sector companies reported for all companies in Year 4.

Both distributions are right-skewed or positively skewed. That means, the mean for each is higher than the median.

The mean for Materials is about \$11 billion, and for Real Estate is slightly above at \$2 billion, and the median for Materials is above \$9 billion meanwhile the median for Real Estate is slightly above \$2 billion.

The standard deviation for Materials is also more about 7 billion for Materials and \$2 billion for Real Estate companies. That means that variability in Total Revenue for Materials companies is higher, with more companies earning above \$9 billion.

The Range of the Materials sector is around \$29 billion meanwhile the Real Estate sector has a Range of \$10 billion making it clear that the Materials sector is more spread than the Real Estate sector.
